# ...THE CLIPPER... GRAIN AND SEED CLEANERS

FAR  
IN ADVANCE  
OF ALL  
OTHERS

SIMPLE  
DURABLE  
...AND...  
EASY-  
RUNNING

**CAPACITY** Market Wheat, 40 Bushels per Hour  
Clover Seed, 12 Bushels per Hour

This Cleaner is adaptable for cleaning all kinds of grain or seeds, such as wheat, oats, corn, barley, rye, buckwheat, alfalfa, timothy, clover, flax, and all other seeds or grain, and is suitable for farm or general use.

**The Clipper** is especially adapted for making effectual separation of wild oats, cheat, cockle, and all foreign seed from wheat and oats, as well as cleaning the perfect seed.

Other manufactures depend entirely upon screens for this work, and with unsatisfactory results. **The Clipper**, however, screens all straw and foreign matter from the grain before it enters the air shaft, and our "**Vertical Blast**" does the rest. Our screens are so arranged as to be in plain view and of easy access to the operator while the machine is in operation.

## **TRADE ANNOUNCEMENT**

Prices herein given will be adhered to as nearly as possible during the season; but it must be understood that I am not bound by them for any definite time or quantity, and that they are subject to advance without notice.

In case there should be a reduction in any article from prices herein given, my customers will receive the benefit of such reduced price, notwithstanding the prices named in this list.

Buyers of small amounts of cheap articles, or of quantities of less than a pound of any one kind, must expect to pay a small advance on these prices.

I beg once more to call the attention of dealers to the fact that my goods are the best of the kind that can be procured, and request my customers not to confound them with the various cheap articles often found in this market. Notwithstanding this, however, I, in common with all large dealers of character and standing, do not warrant my seeds in any particular whatever. If the purchaser does not accept them on these terms, they must be returned at once.

Early Hackensack Musk-Melon

## VALUABLE TABLES

### Quantity of Seed Required to Sow an Acre of Ground.

	<i>Lbs to the Acre.</i>
Alfalfa, or Lucerne.....	25 to 30
Barley—Broadcast.....	125 to 130

## PAPER BAGS FOR SEEDSMEN.

I manufacture the Paper Bags that are used in my own business, and have now increased my facilities in this line for the purpose of supplying seedsmen with an article much superior to the ordinary trade bag. They are all hand-made, and the stock is of the very best quality. Prices have been fixed at a very low figure, considering the high class of the goods.

### SAMPLES ON APPLICATION.

# There's Something In It.

You will find this true when you investigate

## THE CYPHERS INCUBATORS.

The experience of thousands proves it. Their introduction marked an epoch in incubator construction. They are the self-regulating, self-ventilating, non-moisture machines. They made their place and keep it purely on merit. Our guarantee leaves no chance for loss on your part. The new Year Book, "Profitable Poultry Keeping in All Its Branches," 192 pages (8x11) with 200 new and original illustrations, contains a wealth of poultry information. We mail it for 10c in stamps, which is exactly covers postage—The book is Free.
